### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,2,3,4,5,6,7,11,12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnson in GB 2,163,692. Johnson discloses a nozzle for laser cutting or laser welding with two gas supply channels (23,26) that have associated concentric sleeves. Regarding claims 11-13, Johnson discloses a stream of gas from element 23 that is perpendicular to the laser beam and a CO<sub>2</sub> laser (see page 1,line 80).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8,9, and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson (692) in view of Mori in U.S. Patent No. 5,308,951. Mori teaches using a parabolic mirror in a laser machine head to focus the laser beam. It would have been obvious to adapt Johnson in view of Mori to provide this to focus a high-powered laser beam.

5. No certified foreign priority paper has been received that corresponds to German Patent Application No. 03005463, filed 03/15/2003.
